

Hitch Mounted Cargo Carrier

REAR OVERHANG

Rear overhang (ROH) is the distance between the rear overhang line and the rearmost point of the vehicle when the cargo carrier is installed as outlined in the diagram below.

REAR OVERHANG (ROH) ADR43/00

Rear overhang (ROH) shall NOT exceed 60 percent of the distance from the centreline of the front 'Axle' to the line from which 'Rear Overhang' is measured, or 3.7 metres whichever is the lesser.

WEIGHT CAPACITY WARNING

Cargo carrying weight capacity of 225kgs may exceed towbar downward weight capacity, always refer to the lesser value for maximum carrying capacity.
